

I am told that New Jersey has one of the most strict laws concerning "Do Not Call". The Do not Call system has reduced the number of calls I receive from unsolicited companies. But, in my opinion, the law should be more strict to also restrict those taking independent surveys, political advertisements, police benevolent associations and other charities. Anyone that solicits information or money even if a donation and/or information was previously given. Protect the privacy and individual peace and quiet to everyone. Let these companies advertise in newspapers, magazines, etc for any funds or information. Make the Law stronger. Thank you.
